This package includes a FSPassengers Payload Model for Project Open Sky's Boeing 757-200 model for MS Flight Simulator 9. To use it you must have FSPassengers installed and the plane model installed as well. I make no guarantees that it will work with any other plane model.

To use it just drop the contents of this FS Passengers folder into your MS Flight Simulator, FSPassengers, Payload Model folder. By default this is:

c:\Program Files\Microsoft Games\Flight Simulator\FSPassengers\payload_model

But you sim may be set up differently.

Enjoy!
